

Enterprise Land Management Hosted Solutions

eLMS

Edgesoft's Enterprise Land Management Solution (eLMS) is a hosted web-based solution, developed shoulder-to-shoulder with government staff. **eLMS** improves interdepartmental communications by providing shared access to accurate, real-time data.

eLMS facilitates unparalleled integration between City Departments such as **Planning, Permits & Inspections, Code Enforcement, Public Works, Business License** and our **e-Gov On Line Citizen Portal** and all activities are linked to a parcel within the City. **eLMS** provides a comprehensive structure for ever-increasing amounts of data, enabling cities to streamline internal operations, enhance cost efficiency and advance citizen service.
